

### REMOVABLE BLADE GUARD

Need to swap out your blade? The sturdy **blade guard is off in seconds**. While the water cooling system ensures that you get the maximum life out of your blades.

### CYCLONE FILTER

A **dual stage air filter** keeps the Honda engine running for many years to come.

### FAST LOCK

Flip the blade lock and the depth is held right where you want it. **Fast and simple!**

**PATENTED**

Taking the lead from fine auto manufacturers like Mercedes and Lexus, the **13HP Honda engine is vibration isolated** from the saw chassis. By mounting the engine in this manner, very **little vibration** finds it's way to the blade or your hands. Cut for hours and **hours without hand and arm fatigue**, and with very little blade wear.

### QUICK SPECS

	TERRA CUT 450
Blade diameter / Blade shaft diameter	18" / 1"
Max. cutting depth	6.75"
Motor rating	13 h.p., Honda GX390 w/Cyclone Filter
Blade speed	2,600 r.p.m.
Weight (palletized)	275 (325) lbs.
Water tank	8 gal.
OPERATING DIMENSIONS (palletized)	
Length	58" (60")
Height	45" (48")
Width	24" (28")

## Terra Cut 450

### DOUBLE VIBRATION DAMPENING SYSTEM

Vibration damping for both the blade and engine mounts provides for a very **smooth and accurate cutting** action. Operator comfort and extra long blade life are guaranteed!

### EASY TO HANDLE

Great effort was given to engineering a **well balanced floor saw**, making the Terra Cut 450 very easy to maneuver around the job site.

### POLY-V BELT DRIVE SYSTEM

The V-belt drive is **reliable and efficient**. All the available power is delivered directly to the blade with no slip and minimal wear.

### BLADE GUIDE

The blade guide lowers into place quickly and easily, **cuts are very accurate** no matter their length.

### LIFTING HOOK

There is a lifting hook built into the main frame. Lifting the Terra Cut 450 to any height is **simple and safe**.

### CUTTING DEPTH INDICATOR

**Accurate** and reliable.

### 8 GALLON WATER TANK

Made out of Polyethylene the large capacity water tank is designed with a quick release system. **Easy on, easy off.**

### SUPER RIGID FRAME

The welded steel chassis has a series of **stiffening ribs** which deliver an accurate and vibration free cutting performance.

### AUTOMATIC PARKING BRAKE

The braking system actuates as the saw is raised. Park the Terra Cut 450 on the steepest hill and rest assured it will **stay in place**.
